Jumps Short Program

1. QUESTION:

What is the GOE in the Short Program if a jump in the jump combination and the solo jump are the same, example: solo jump 3T and jump combination 3Lz+3T?

1. ANSWER:

The GOE is unrestricted and based on the quality of the two jumps performed. The repeated jump 3T will get a * and will not receive any value.

2. QUESTION:

What is the GOE in the Short Program if there is an extra jump in the jump combination or two jump combinations, example: 3F+3T+1L, 3Lz+1T?

2. ANSWER:

The GOE is unrestricted and based on the quality of jumps performed. Any extra jumps will receive a * and will not receive any value. Extra jumps not according to requirements will be considered in order of execution.
